

Placements

- A placement is real life work experience with an employer
- Placements are for 3 days each week
- On placement, you follow a programme of training that is designed with your employer

Why go on placement?

- To gain work experience
- To develop relevant skills
- To meet new people
- To help you become work ready
- Placements are extremely important as they help you gain “on the job skills” that employers want

Finding a placement

- Tell your tutor if you already know of a work placement you would like to go to or if you have already secured a placement.

Finding a suitable work placement is an integral part of the programme. Your tutor will support YOU in doing this.

Work Ready

If you do not feel ready for Full Work Based Learning with an employer 3 days a week then you can do Work Experience instead.

Work Experience

- The work experience will take place over a shorter number of hours and days

If you are not ready for Work Experience you can do Work Based Simulation within Springvale or USDT.

Work Based Projects within Springvale or USDT

The work experience will take the form of short work based simulation projects with staff in Springvale or USDT. They will be fully supported and supervised within different departments throughout the organisation with work experience that is relevant to their qualification.
